

## Bimetal thermometer Model 54, industrial series

WIKA data sheet TM 54.01

for further approvals  
see page 6

### Applications

- General process instrumentation in the chemical and petrochemical industries, oil and gas industries, energy and water/wastewater industries
- Temperature measurement in harsh and aggressive environments
- With liquid damping also suitable for applications with high vibrations

### Special features

- Scale ranges from -70 ... +500 °C
- Case and stem from stainless steel
- Bimetal with zero point adjustment at the back of the case
- Individual stem length from 63 ... 1,000 mm
- DNV GL approval (option)

### Description

The model 54 bimetal thermometer has been developed and is manufactured in accordance with the EN 13190 standard. The thermometer meets the high requirements of the process industries.

Especially in the chemical and petrochemical, oil and gas, power engineering and shipbuilding industries, the temperature measuring instrument manufactured from stainless steel is used successfully. Through the high ingress protection of the thermometer (IP65) and its liquid damping, operation under high vibration conditions is possible.

The model 54 satisfies the high requirements for resistance against aggressive media. As an option, the casing, the stem and the process connection can be made from 316Ti (1.4571).

To allow optimum fitting to the process, individual insertion lengths and different process connections can be selected.

## Standard version

### Measuring element

Bimetal coil

### Nominal size in mm

63, 80, 100, 160

### Connection designs

S Standard (male thread connection) <sup>1)</sup>

1 Plain stem (without thread)

2 Male nut

3 Union nut

4 Compression fitting (sliding on stem)

5 Union nut with fitting

1) Not for version "adjustable stem and dial"

### Model overview

Model	NS	Design
A5400	63	Back mount (axial)
A5401	80	
A5402	100	
A5403	160	
R5440	63	Lower mount (radial)
R5441	80	
R5442	100	
R5443	160	
S5410	63	Back mount, adjustable stem and dial
S5411	80	
S5412	100	
S5413	160	

### Accuracy class

Class 1 per EN 13190

### Working range

Normal (1 year): Measuring range (EN 13190)

Short time (24 h max.): Scale range (EN 13190)

### Case, ring

Stainless steel 1.4301 (304)

### Stem, process connection

Stainless steel 1.4571 (316Ti)

### Elbow behind the case

Aluminium, only with lower mount version

### Dial

Aluminium, white, black lettering

### Window

Instrument glass

### Pointer

Aluminium, black, adjustable pointer

### Insertion length L<sub>1</sub>

63 ... 1,000 mm

minimum/maximum length is dependent on the measuring range and diameter

### Permissible ambient temperature at case

-20 ... +60 °C (others on request)

### Temperature limits for storage and transport

-20 ... +60 °C (EN 13190)

### Permissible operating pressure at the stem

max. 25 bar, static

### Ingress protection

IP65 per IEC/EN 60529

## Options

- Scale range °F, °C/°F (dual scale)
- Liquid damping up to max. 250 °C (at the sensor)
- DNV GL approval in connection with liquid damping, not with adjustable stem and dial design or NS 160, vibration loading 25 ... 200 Hz, 5 g (for further information see certificate No. 40156-01 HH)
- Laminated safety glass, polycarbonate
- Stem diameter 6, 10 mm
- Ingress protection IP66
- Special measuring ranges or dial printing to customer specifications (on request)
- Version per ATEX

## Thermowell

In principle, the operation of a mechanical thermometer without a thermowell with low process-side loading (low pressure, low viscosity and low flow velocities) is possible.

However, in order to enable exchanging the thermometer during operation (e.g. instrument replacement or calibration) and to ensure a better protection of the instrument and also the plant and the environment, it is advisable to use a thermowell from the extensive WIKA thermowell portfolio.

For further information on the calculation for the thermowell, see Technical information IN 00.15.
